He later became an Electrical Engineer for Raytheon in Portsmouth, RI, where he developed and implemented guiding systems for the United States Department of Defense.

As a young man, Louis played the saxophone in a jazz band. Louis's love for

music later prompted him to learn to play both the acoustic and electric guitars. An avid reader and connoisseur of learning, Louis taught himself to speak German, and continued to enjoy many works written in German. Louis loved his sportscars, in fact, he owned many throughout the years, his favorite being his 1989 Porsche 911 Carrera.
